1. \_\_\_\_\_ the statement that an induced current is always produced in a direction such that the resulting magnetic field opposes the change in the magnetic field that is causing the induced current
2. \_\_\_\_\_ the potential difference that is produced by electromotive induction
3. \_\_\_\_\_ a transformer with a lower potential difference across the secondary circuit than across the primary circuit
4. \_\_\_\_\_ the effect that occurs in a transformer when a varying magnetic field produced in the primary coil is carried through the iron core to the secondary coil, where the varying field induces a varying *EMF*
5. \_\_\_\_\_ a device that increases or decreases the potential difference with little loss of energy
6. \_\_\_\_\_ the generation of current through a circuit due to the relative motion of a magnetic field
7. \_\_\_\_\_ a transformer with higher potential difference across the secondary circuit than across the primary circuit

**Understanding Physics** David C. Cassidy, Gerald Holton, F. James Rutherford, 2002-09-10

Understanding Physics provides a thorough grounding in contemporary physics while placing physics into its social and historical context Based in large part on the highly respected Project Physics Course developed by two of the authors it also integrates the results of recent pedagogical research The text thus teaches about the basic phenomena in the physical world and the concepts developed to explain them shows that science is a rational human endeavor with a long and continuing tradition involving many different cultures and people develops facility in critical thinking reasoned argumentation evaluation of evidence mathematical modeling and ethical values The treatment emphasizes not only what we know but also how we know it why we believe it and what effects that knowledge has Why do we believe the Earth and planets revolve around the Sun Why do we believe that matter is made of atoms How do relativity theory and quantum mechanics alter our conception of Nature and in what ways do they leave the classical concepts unchanged What impact does the knowledge of finite energy resources have on our society How have applications of fundamental science such as the steam engine the laser the electric generator the transistor affected our lives How does the evidence for non scientific ideas such as UFOs ESP and the like differ from the evidence for accepted scientific results
