Electron Acceleration In The Aurora And Beyond:

Electron Acceleration in the Aurora and Beyond D Bryant, 1998-10-01 How did electrons in the high atmosphere and space around the Earth come to acquire their speeds and energies This intriguing question lies at the heart of understanding how high energy electrons create the spectacular displays of the Aurora Borealis and Aurora Australis Electron Acceleration in the Aurora and Beyond explores the mysteries

Electric Currents in Geospace and Beyond Andreas Keiling, Octav Marghitu, Michael Wheatland, 2018-05-08 Electric currents are fundamental to the structure and dynamics of space plasmas including our own near Earth space environment or geospace This volume takes an integrated approach to the subject of electric currents by incorporating their phenomenology and physics for many regions in one volume It covers a broad range of topics from the pioneers of electric currents in outer space to measurement and analysis techniques and the many types of electric currents First volume on electric currents in space in over a decade that provides authoritative up to date insight on the current status of research Reviews recent advances in observations simulation and theory of electric currents Provides comparative overviews of electric currents in the space environments of different astronomical bodies *Electric Currents in Geospace and Beyond* serves as an excellent reference volume for a broad community of space scientists astronomers and astrophysicists who are studying space plasmas in the solar system Read an interview with the editors to find out more <https://eos.org/editors-vox/electric-currents-in-outer-space-run-the-show>

Haaland, Andrei Runov, Colin Forsyth, 2017-10-30 Dawn Dusk Asymmetries in Planetary Plasma Environments Dawn dusk asymmetries are ubiquitous features of the plasma environment of many of the planets in our solar system They occur when a particular process or feature is more pronounced at one side of a planet than the other For example recent observations indicate that Earth's magnetopause is thicker at dawn than at dusk Likewise auroral breakups at Earth are more likely to occur in the pre midnight than post midnight sectors Increasing availability of remotely sensed and in situ measurements of planetary ionospheres magnetospheres and their interfaces to the solar wind have revealed significant and persistent dawn dusk asymmetries As yet there is no consensus regarding the source of many of these asymmetries nor the physical mechanisms by which they are produced and maintained Volume highlights include A comprehensive and updated overview of current knowledge about dawn dusk asymmetries in the plasma environments of planets in our solar system and the mechanisms behind them Valuable contributions from internationally recognized experts covering both observations simulations and theories discussing all important aspects of dawn dusk asymmetries Space weather effects are caused by

processes in space mainly the magnetotail and can be highly localized on ground Knowing where the source i.e. where dawn dusk location is will allow for a better prediction of where the effects on ground will be most pronounced Covering both observational and theoretical aspects of dawn dusk asymmetries Dawn Dusk Asymmetries in Planetary Plasma Environments will be a valuable resource for academic researchers in space physics planetary science astrophysics physics geophysics and earth science
