Scientists and Engineers Richard H. Enns, George McGuire, 2012-12-06 Science demands that all theory must be checked by

experiment Richard Feynman Nobel Laureate in physics 1965 reminds us in a wonderful quote that The test of all knowledge

is experiment Experiment is the sole judge of scientific truth 1 It is because nonlinear physics can be so profoundly counter

intuitive that these laboratory investigations are so important This manual is designed to be used with the text Nonlinear

Physics with Maple for Scientists and Engineers Understanding is enhanced when experiments are used to check so please

attempt as many of the activities as you can As you perform theory these activities we hope that you will be amazed and

startled by strange behavior intrigued and terrorized by new ideas and be able to amaze your friends as you relate your

strange sightings Remember that imagination is just as important as knowledge so exercise yours whenever possible But

please be careful as nonlinear activities can be addicting can provide fond memories and can awaken an interest that lasts a

lifetime Although it has been said that a rose by any other name is still a rose with apologies to Shakespeare the authors of

this laboratory manual have in an endeavor to encourage the use of these nonlinear investigations called them experimental

activities rather than experiments A number of design innovations have been introduced A      *Novel Algorithms and*
