Nissinen,2005-03-11 The European Union has highlighted the issue of environmentally sound use of products in the context
of Integrated Product Policy IPP Accordingly consumers should have easy access to understandable relevant and credible
environmental information Information about product characteristics is available in different forms and sources but in many
cases relevant environmental information is not available on the product itself The study described in this report was
initiated in order to produce information on the state of user instructions regarding environmental information User manuals
of passenger cars and refrigerators were focused on examining the advice which could diminish the harmful environmental
effects of the use of these products Other studied products included such durable products as textiles and furniture as well as
such consumables as cleaning chemicals and recyclable paper products The study raised many ideas about actions that could
promote the status and eco development of instructions for use Instruction Manual for Installation, Use and Maintenance
