A Gestalt Therapist's Guide Through the Depressive Field Jan Roubal, 2024-11-28 This book is intended for psychotherapists working with depressed clients. In particular, it focuses on how working with depressed clients affects the therapists themselves and elaborates on how therapists can care for themselves in such demanding work to prevent burnout or process it meaningfully as part of their professional development. Based on the results of the author's own long-term experience, qualitative research, and theoretical concepts describing psychopathology from the humanistic existential perspective of Gestalt therapy, this book describes a paradoxical way of working in which therapists transform their own experience in the presence of a depressed client. Using the example of working with depression, the book introduces how the field theory approach can be used in clinical practice. The book provides a conceptual framework, practical skills, and case examples illustrating what a field theory approach brings new to the table. This will be a useful guide for psychotherapists and Gestalt therapists who regularly come into contact with depressive clients as well as for therapists who are themselves experiencing professional exhaustion and are at risk of reaching burnout.

Counseling and Psychotherapy Douglas R. Gross, 2003 This is the ideal book for readers who are just beginning their study of counseling and psychotherapy. From it, they will secure a solid foundation in the major theories of counseling and psychotherapy from twenty-three authors who are experienced in the theory they discuss. Because each theory is presented using a standard format and bolstered by a running case study, readers will also come away from this text with the cross-theory comparisons they need to decide on their own course of specialized study and determine a personal perspective on counseling. Coverage includes Eastern theories, feminist theories, body-centered, and Rational Emotive Behavioral Theory. For anyone interested in pursuing a career in counseling and psychotherapy.

Theories of Counseling and Psychotherapy Linda Seligman, Laurie W. Reichenberg, 2010 Theories of Counseling and Psychotherapy categorizes theories by their focus, background, emotions and sensations, thoughts or actions. This structure helps students better understand similarities and differences among theories and provides an overarching framework that other texts lack.
