## Passage 1: Life in the Desert

The desert is a dry place with very little rain. It can be very hot during the day and cold at night. Some deserts, like the Sahara, have sand dunes that stretch for miles. Other deserts, like the Sonoran Desert, have rocky ground and cactus plants. Many animals live in the desert, such as lizards, snakes, and camels. These animals have special ways to survive in the heat. For example, camels store fat in their humps to go long periods without food and water.

People also live in the desert. They build houses with thick walls to keep cool. Some use wells to get water from deep underground. Even though the desert is hot and dry, it is home to many living things.

## Passage 2: Life in the Rainforest

The rainforest is warm and wet. It rains almost every day, and the air feels humid. The trees in the rainforest are tall and have thick, green leaves. The rainforest is home to many animals, such as monkeys, parrots, and jaguars. Some animals, like sloths, move slowly through the trees, while others, like toucans, fly high in the sky.

People live in the rainforest, too. Some build houses on stilts to stay above the wet ground. Others travel by boat on rivers instead of using roads. The rainforest is a lively place with plants and animals everywhere.
