Extreme Why Some People Thrive At The Limits:

Extreme Emma Barrett, Paul Martin, 2014-10-23 Why do some people risk their lives regularly by placing themselves in extreme and challenging situations For some such as astronauts the extreme environments are part of the job For others they involve the thrill and competition of extreme sports or the achievement of goals such as being the first to reach the South Pole or climb Everest Whether for sport or employment all these people have made the personal choice to put themselves in environments in which there is significant risk What drives such people And what skills and personality traits enable the best to succeed What abilities are shared by the successful mountaineer astronaut caver or long distance solo sailer And are there lessons the rest of us can learn from them The psychology of those who have to cope with extreme conditions has been a matter of much research It is important for example to those planning manned space programmes or the makeup of teams who will spend months in an isolated or hostile environment such as Antarctica to understand the psychological pressures involved and to recognize those best equipped to handle them In *Extreme* Emma Barrett and Paul Martin explore the challenges that people in extreme environments face including pain physical hardship loneliness and friction between individuals and the approaches taken to overcome them Using many fascinating examples and personal accounts they argue that we can all benefit from the insights gained

Weird Olga Khazan, 2020-04-07 Learn why the concept of weird is being reclaimed and turned into a badge of honor used to show how being different culturally socially physically or mentally can be a person's greatest strength Most of us have at some point in our lives felt like an outsider sometimes considering ourselves too weird to fit in Growing up as a Russian immigrant in West Texas Olga Khazan always felt there was something different about her This feeling has permeated her life and as she embarked on a science writing career she realized there were psychological connections

between this feeling of being an outsider and both her struggles and successes later in life She decided to reach out to other people who were unique in their environments to see if they had experienced similar feelings of alienation and if so to learn how they overcame them *Weird* is based on in person interviews with many of these individuals such as a woman who is professionally surrounded by men a liberal in a conservative area and a Muslim in a predominantly Christian town In addition it provides actionable insights based on interviews with dozens of experts and a review of hundreds of scientific studies *Weird* explores why it is that we crave conformity how that affects people who are different and what they can do about it First the book dives into the history of social norms and why some people hew to them more strictly than others Next Khazan explores the causes behind and the consequences of social rejection She then reveals the hidden upsides to being weird as well as the strategies that people who are different might use in order to achieve success in a society that values normalcy Finally the book follows the trajectories of unique individuals who either decided to be among others just like them to stay weird or to dwell somewhere in between Combining Khazan s own story with those of others and with fascinating takeaways from cutting edge psychology research *Weird* reveals how successful individuals learned to embrace their weirdness using it to their advantage
