Monkey Two Paul Adams, 2017-10-05 In 1925 the State of Tennessee enacted a law that prohibited the teaching of evolution in public schools specifically that man came from apes The law was immediately challenged by the ACLU and pitted two famous lawyers Clarence Darrow and William Jennings Bryan a religious Fundamentalist and one time presidential candidate in a bruising contest The case became famous known as the Monkey Trial In this fictional trial a high school teacher was fired for introducing religion into his biology class in the form of criticism of Darwinism The trial involves expert witnesses from a variety of fields who defend and attack Darwinism but not merely from a biology point of view There are deep religion atheism legal political philosophical and cultural issues that are at stake and reflect today's bifurcated society The Supreme Court cases in the past fifty years on the Establishment Clause of the First Amendment are demonstrated as in disarray especially in school religion cases The famous bioatheist Richard Dawkins is called out for his trenchant criticism of Christians and distortion of Darwinism to achieve his ends The lawyers are cut from vastly different cloth an ex Vietnam soldier and an anti war conscientious objector But the scientific and religious experts do most of the talking from the witness stand The present book describes the preparation for and First Week of Trial

Cases in Clinical Forensic Psychology Margo C. Watt, 2023-11-01 Clinical forensic psychology is defined by the application of clinical psychology assessment diagnosis treatment and consultation in legal contexts The term captures the integration of clinical psychology as an applied professional discipline and forensic psychology as an experimental discipline Cases in Clinical Forensic Psychology offers a series of case studies that allow readers to take an up close and personal look at the criminal justice system in Canada Clinical forensic psychologist Margo C Watt examines the particulars of each case including the biological psychological social cultural and legal factors The book takes an evidence based approach and highlights how the science of clinical forensic psychology informs all aspects of criminal cases police investigative techniques eyewitness testimony pretrial publicity jury selection and decision making forensic evaluations psychological autopsies mental health in corrections and more Examining incidents ranging from false confessions to
