sustain a growth transportation team much longer In 2010 there were only 17 000 electric cars on the road and the world By 2019 there were 72 million that is a 42 000% increase in electric vehicles In the United States electric vehicles make up less than 1% of the 250 million registered vehicles On the other hand public opinion still in opposition to electric vehicles A recent Pew Research Center report found 51% of US adults oppose a proposal to phase out production of gasoline powered cars and trucks for EVs I believe that the team from General Motors People are uninformed about modern electric vehicles and when they think of EVs they either think of a 2010 Chevy Volt that has a battery capacity of about 100kWh that is unrealistic In reality electric vehicles are much better and reliable and now with the new car manufacturers from Tesla to GM trying to get a piece of the pie competition is rising now Keep on reading this to find out In the end we will see but some of the most important things to do to electric vehicles is to get a good working road
