Exploring Education Through Phenomenology Diverse Approaches:

Exploring Education Through Phenomenology Gloria Dall'Alba, 2010-01-15 This book explores the resurgence of interest in phenomenology as aphilosophy and research movement among scholars in education thehumanities and social sciences Brings together a series of essays by an international team of philosophers and educationalists Juxtaposes diverse approaches to phenomenological inquiry and addresses questions of significance for education today Demonstrates why phenomenology is a contemporary movement that is both dynamic and varied Highlights ways in which phenomenology can inform a broad range of aspects of educational theorising and practice including learning through the body writing online being an authenticteacher ambiguities in becoming professionals and schooltransition Exploring Curriculum Landscapes in Africa Oscar Koopman, Karen J. Koopman, Wally Lumadi, Samuel Amponsah, 2025-06-13 This book examines post colonial curriculum transformation across seven African nations These are South Africa Egypt Cameroon Nigeria Zimbabwe Namibia and Ghana It investigates whether these educational systems have truly decolonized their curricula or still remain rooted in Western frameworks despite achieving political independence Through analysis of curriculum policies and teaching practices the authors explore educational reform dynamics in post colonial African contexts The book evaluates how successfully these systems have incorporated indigenous knowledge and local ways of knowing versus continuing to propagate Western paradigms The work provides both theoretical and empirical analysis of challenges and opportunities in rebuilding African education systems that reflect local cultural values while addressing modern educational needs Heideager and the Lived Experience of Being a University Educator Joshua Spier, 2018-02-09 This book explores the lived meanings of being a university educator from an existential perspective The book enriches our understanding of educators experiences in light of Martin Heidegger's early philosophy and vice versa opening our understanding of Heidegger's philosophy through educators experiences Also drawing on the philosophical insights of Hans Georg Gadamer the book situates the purposes and experiences of the educator in historical and contemporary contexts In doing so the author reveals that being a university educator is essentially characterised by conversation and time Inspired by the author s own experiences of teaching community development and sociology within a youth work specific bachelor degree the book invites educators to apply existential philosophy as a tool to reflect upon their own experiences and to reconnect with the question of what it means to be an educator in their shared world of practice This thoughtful volume is sure to resonate with the experiences of readers who educate within a university context Being and Becoming Through Higher Education Gloria Dall'Alba, 2024-07-10 This book focuses on the importance of an ontological dimension for today s higher education with critical attention to implications for the student experience engagement satisfaction wellbeing employability dis embodiment and activism in which students take a stand on their own being and becoming In accessible language key philosophical ideas are explored for their relevance to contemporary higher education integrating philosophical with pedagogical perspectives Although much of

the material has been published previously there is value in bringing it together into a single volume in exploring an ontological dimension of higher education as it is embodied In doing so the book demonstrates benefits to pedagogy through sustained attention to philosophy and theory and vice versa thereby contributing to recent heightened interest in the philosophy and theory of higher education This book is intended to prompt re imagining the ways in which higher education is conceived and conducted An argument is put forward for greater emphasis on expanding possibilities for knowing acting and being toward fuller lives of interdependence with others and things in an interconnected world Through highlighting an ontological dimension in this manner a hope filled future emerges for higher education **Essays on Nature and the** Philosophy of Environmental Education Michael Bonnett, Justin Dillon, Alan Reid, 2025-09-26 This volume identifies and debates important elements of what would be involved in an education that is truly adequate for the environmental situation that currently confronts us The chapters in the book present a wide variety of perspectives and raise questions about much mainstream environmental education particularly the heavy emphasis given to science in understanding environmental problems and to technology for solving them Contributions argue that there are other equally if not more important aspects to be considered notably our underlying attitudes towards nature and the quality of our underlying relationship with it They raise questions about what we mean by nature and how we come to know it most authentically in its many facets The overweening anthropocentrism and desire for mastery that informs much of current Western engagement with nature is revealed as stymying our ability properly to recognise nature s intrinsic value and moral standing Consideration is given to the need for a curriculum in which morality poetry and myth art and the humanities have key roles to play and where our understandings of the qualities of time and space that frame the curriculum are refreshed. The majority of the chapters in this book were originally published in the journal Environmental Education Research **Out-of-Field Teaching and Education Policy** Anna Elizabeth Du Plessis, 2020-01-11 This book focuses on the elusive out of field teaching phenomenon and its direct effects on quality education globally Based on the experiences and concerns of teachers and school leaders it investigates the phenomenon s impact on everyday teaching and school practices and offers insights into the challenges that out of field teachers face in maintaining their role as the knowledgeable counterpart in their teaching and learning environments In this frame it also highlights the often overlooked importance of initial teacher education and its preparation of prospective teachers for employment in complex school contexts subjects or year levels. The book emphasises the need to develop specific policy strategies to effectively address the global implications of out of field teaching and explores the potential of micro education policies as targeted support resources for teachers in these challenging positions Through this new policy lens which renegotiates the discourse of education policy as a quality education improvement framework the book offers readers a comprehensive understanding of the urgent need for policy to uphold all stakeholders involved in these unique and complex environments Accordingly the book is a valuable resource for academic advisors decision makers policy
