Extinction Age Extinction Cycle Volume 3:

Extinction Age Nicholas Sansbury Smith, 2017-07-25 The third book in USA Today bestselling author Nicholas Sansbury Smith's propulsive post apocalyptic series about one man's mission to save the world. Humans are losing the war. Master Sergeant Reed Beckham and the survivors of 1st Platoon must battle through the tunnels where they make a grisly discovery. Dr. Kate Lovato is working on a new bioweapon to destroy the Variants when a derelict Navy Destroyer crashes into the Connecticut shoreline carrying yet another threat. As the doomsday clock ticks down and military bases fall across the country, the human race enters the age of extinction. Will they prevail or will mankind vanish off the face of the planet? In the fight for humanity, one final hope remains: pick up the series that D.J. Molles said delivers unrelenting, unmerciful action before it's too late. The Extinction Cycle: Book 1 Extinction Horizon, Book 2 Extinction Edge, Book 3 Extinction Age, Book 4 Extinction Evolution, Book 5 Extinction End, Book 6 Extinction Aftermath, Book 7 Extinction War. *Ontohackers: Radical Movement Philosophy in the Age of Extinctions and Algorithms, Part I* Jaime Del Val, 2024-05-15 Ontohackers redefines what movement worlds and bodies are through the sense of proprioception reconceptualized as formless fluctuation field, a movement matrix that is itself also thought and which underlies all life forms and fields including the inorganic. Our worlds are made of endless such entangled fields, folding in never-ending variation or enframement. The current planetary crisis has emerged due to an accidental evolutionary alignment narrowing and impoverishment of that matrix's indeterminacy that appeared gradually and eventually with bipedalism and which created an imbalance between the larger proprioceptive field and its brain and made the atrophied body extend itself technically in geometric fields, gradually covering the planet along with its fears, with disastrous consequences that are unleashing an unprecedented type of mass extinction and species suicide. The reply to this crisis, which is urgently due if we are to reduce even slightly the collapse coming up over the next decades, is in recovering a lost sensorimotor plasticity which is also cognitive, affective, and relational plasticity through developing movement techniques for cultivating Body Intelligence (BI), reversing and taking elsewhere the failed evolution culminating in AI, stepping down from humanist, supremacist pedestals, undoing our dependency from unsustainable killing machines of sedentary consumerism that impoverish experience, stopping the reproduction of a species that has become plague by reversing heteronormative reproductive dogmas till we reach preagricultural population levels and recovering the joys of moving with the world in symbiotic mutation towards unprecedented evolutionary variations. This is our cosmic responsibility for all life on Earth. The book's structure expresses Enframement Theory with regard to how processes of becoming have a triple movement: an incipience, unfolding the field; Part I, a condensation/expansion where the field acquires full consistency; Part II, and a resonance or memory of the field relating to other fields. Part III, Part I includes Books 1 to 3 out of 7. The preface sets the context of the book, the extinction crisis. Book 1 provides an introduction to the entire field of the book and metareflects on the book's structure and process. Book 2 is a full treatise on proprioception, developing the theory of Body Intelligence and

addressing core issues of cognition perception communication and an ontological redefinition of the body as proprioceptive swarm Book 3 develops all core concepts of Radical Movement Philosophy unfolding into several sections first introducing the fluctation field and swarm theory secondly the core concepts of clinaos indeterminacy metabody consistency and intraduction variation coming together in the concept of enferance Finally another triad further unfolds the previous as rhythm affect orientation desire and contact sex closing with an orgiastic cosmo ontology that opens the way to Part II
