The Third Way Louis M. Houston,2013-04-25 In this day and age people are challenged by an information rich environment that is filled with erratic and inconsistent concepts Added to the pre existing struggle to adhere to societal and physical laws we must struggle to control our own physical emotional and intellectual systems By projecting the basic structure of physics into a psychological framework we model disorganized behavior as a product of entropy or disorder As heat energy is highly entropic we propose that the exclusion of heat energy from our intellectual system reduces the intrinsic entropy in our thinking and promotes mental harmony We refer to this method as the third way Along with the exclusion of heat it includes a balance between positive and negative mental energy that is fundamentally related to meaning and abstraction This produces a still point and from the equilibrium of this still point emerges a positive overtone that we refer to as meta positivity The third way is so named in reference to the first way and the the second way Essentially the first way produces control of the physical system The second way produces control of the emotional system and the third way produces control of the intellectual system

Finding the Still Point Tom Harpur,2002 Harpur focuses on a spiritual approach to dealing with stress Using sacred texts from many religions he illustrates how many of the modern methods used like breathing and meditation originated in religious ritual Over time these techniques were divorced from their spiritual roots and now lack a potency which they were meant to have and impart 2002
