Dystopias and Utopias on Earth and Beyond Douglas A. Vakoch,2021-04-29 Caught as we are in a grave climate crisis that seems more irreversible with every passing year our literary portrayals of the future often feature the dystopian collapse of the world as we know it Science fiction explores how we got here while pointing toward a more hopeful path forward From an ecofeminist perspective a core cause of our current ecological catastrophe is the patriarchal domination of nature playing out in parallel with the oppression of women As an alternative to dystopian futures that seem increasingly inevitable ecofeminist science fiction helps us conjure utopias that promote environmental sustainability based on more egalitarian human relationships Dystopias and Utopias on Earth and Beyond Feminist Ecocriticism of Science Fiction explores the fictional worlds of such canonical novelists as Margaret Atwood Octavia Butler Ursula K Le Guin Doris Lessing and Joan Slonczewski as well as those of lesser known science fiction writers as they collectively probe humanity's greatest existential threats Contributors from five continents provide compelling analyses of far future dystopias on Earth that are all too easy to imagine becoming reality if humankind's current trajectory continues as well as provocative insights into science fiction utopias set on idyllic planets orbiting distant stars which offer liberatory alternatives that might someday be actualized in the real world By examining the links between the destruction of the environment and the domination of women Dystopias and Utopias on Earth and Beyond provides the tools to counteract those intertwined oppressions helping create a foundation for a truly habitable world

Simak, 2015-07-21 This award winning science fiction classic explores a far future world inhabited by intelligent canines who pass down the tales of their human forefathers Thousands of years have passed since humankind abandoned the city first for the countryside then for the stars

and ultimately for oblivion leaving their most loyal animal companions alone on Earth. Granted the power of speech centuries earlier by the revered Bruce Webster, the intelligent pacifist dogs are the last keepers of human history, raising their pups with bedtime stories passed down through generations of the lost websters who gave them so much but will never return. With the aid of Jenkins, an ageless service robot, the dogs live in a world of harmony and peace. But they now face serious threats from their own and other dimensions, perhaps the most dangerous of all being the reawakened remnants of a warlike race called Man. In the Golden Age of Isaac Asimov and Robert A. Heinlein, Clifford D. Simak's writing blazed as brightly as anyone's in the science fiction firmament. Winner of the International Fantasy Award, City is a magnificent literary metropolis filled with an astonishing array of interlinked stories and structures at once dystopian, transcendent, compassionate, and visionary.

British Fantasy and Science-fiction Writers Since 1960 Darren Harris-Fain, 2002. Essays on British writers of fantasy and science fiction discuss the changing attitudes towards this genre, including serious consideration by critics. Covers the publication of science fiction in comic books, limited productions of publications by fan presses, the difference between British and American science fiction, the birth of the New Wave, and the revival of horror fiction as a distinct genre.

Science Fiction, Canonization, Marginalization, and the Academy Gary Westfahl, George Slusser, 2002-01-30. Science fiction occupies a peculiar place in the academic study of literature. At a time when the canon is being consciously expanded and diversified, and when there is growing scholarly interest in technology and popular culture, works of science fiction are nonetheless marginalized by the academy. So too many works of science fiction engage recognized canonical texts such as the Odyssey, yet traditionalists within the academy have largely shunned the serious study of science fiction. In this book, expert contributors examine the traditional and continuing tendency to exclude science fiction from the literary canon. In exploring this topic, the book addresses many broader issues such as the nature of canon formation, the role of journals in legitimizing academic inquiry, and the cultural politics of academic gatekeeping.

Time machine: Utopia or Science Fiction Kristijan Zrinski, 2013-06-26. Seminar paper from the year 2012 in the subject Didactics for the subject English Literature, Works grade 3.0. University of Trier, language English, abstract. This term paper deals with the question which literary genre *The Time Machine* by H. G. Wells fits best into. Should it be seen as a dystopian novel, or should it be rather classified as a science fictional one, and why is it so hard to classify? As the novel shows characteristics for either genres, the novel has to be analysed accurately. In order to do so and find an answer to the main question, I will point out and examine relevant passages in the text which will help classifying Wells' work. Therefore, it is essential to first of all define both literary genres. These definitions are to include the origin of the genre, main characteristics, as well as appropriate background information. As already mentioned, the definitions will be followed by an in-depth analysis of significant text.
